Name addition:

USGS name _____
Local name Clam Cove Creek

Species	Date(s) Observed	Spawning	Rearing	Migration
<u>Coho</u>	<u>11-8-89</u>	<u>x</u>	<u>x</u>	<u>x</u>

Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc.

T75S, R90E, S36 : Trap #1 (just above estuary) had 8 juv. coho and 4 cottids after a 90 minute soak. Trap #2 (1/2 way between upper ITZ and beaver dam) had 16 juv. coho. after a 50 minute soak. Trap #3 (at lower end of beaver pond habitat) had 1 juv. coho. captured after a 10 minute soak. Upper extent of habitat undetermined. Pink salmon also reported by area residents.
Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls. Attach a copy of the fish survey data, if available.

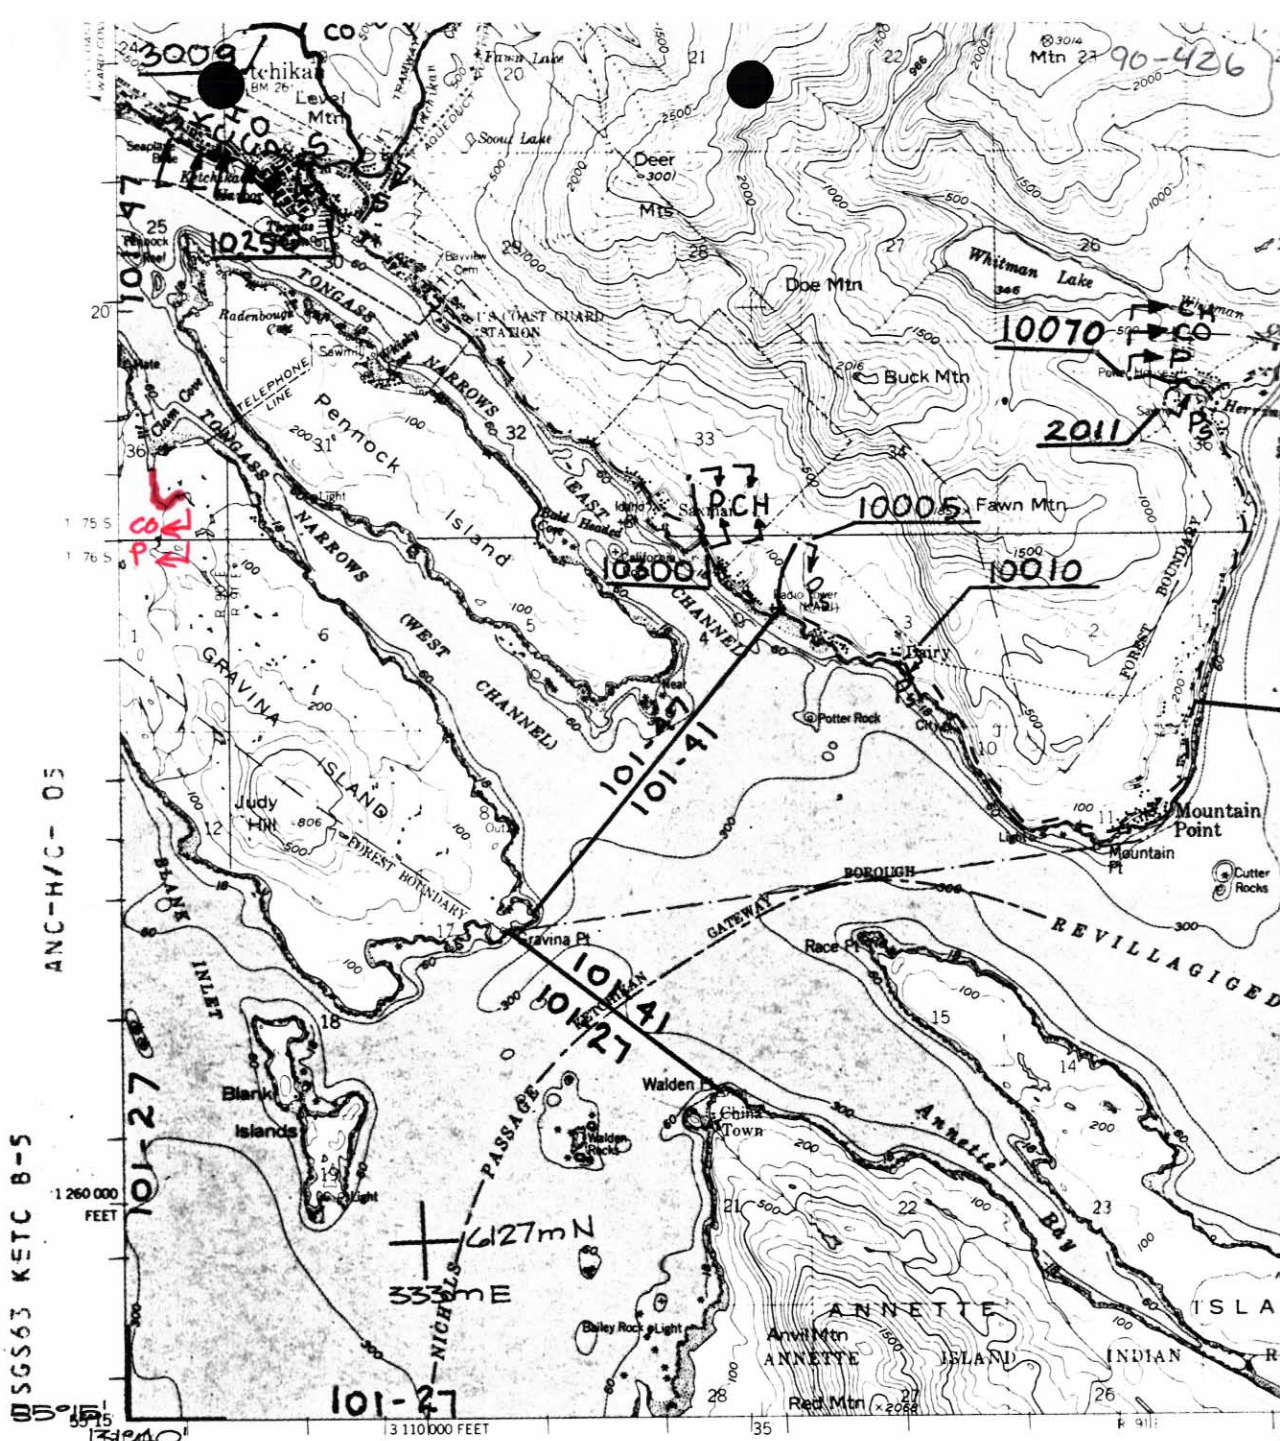

Name of Observer (please print) _____

Date: Nov. 9, 1989

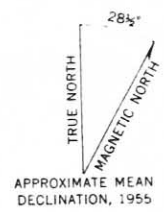

Signature: _____

Address: _____

Signature of Area Biologist: _____

Mapped, edited, and published by the Geological Survey
 Control by USGS and USC&GS
 Topography by photogrammetric methods from aerial photographs taken 1948, field annotated 1955. Map not field checked
 Selected hydrographic data compiled from USC&GS Charts 8075, 8094, 8095, 8102 (1:229,376 scale), T-2061 and H-2111. This information is not intended for navigational purposes
 Universal Transverse Mercator projection, 1927 North American datum
 10,000-foot grid based on Alaska coordinate system, zone 9
 1000-meter Universal Transverse Mercator grid ticks, zone 1, shown in blue
 Land lines represent unsurveyed and unmarked locations predetermined by the State of Alaska, Division of Lands
 Copper River Meridian
 Entire land area is within the Tongass National Forest except Ketchikan exclusion area and Annette Island Indian Reservation

 ANADI
 ANADROMO

The Sitka plant is now however at capacity. A site visit is scheduled for review of tributaries to the Indian river and Wrinklneck Creek, wetlands, and the proposed waste site. At present we have inadequate information to determine if the proposed disposal is reasonable, especially compared to alternatives. APC has not been very helpful in identifying or evaluating alternatives to date.

12. Ketchikan Opposes Kachemak Bay State Park Lands Trade: A resolution objecting to trading state-owned resources in Southeast to enlarge Kachemak Bay State Park has been unanimously approved by the Ketchikan Gateway Borough Assembly. The Borough recognizes that the Ketchikan area also has a need for the limited state-owned lands which have been designated in southern southeast Alaska. In an effort to fulfill local needs, the Borough's resolution opposes a trade that interferes with the availability of exchangeable lands to meet the recreational, water and power requirements of the Ketchikan area. Assembly members also seemed somewhat upset that the ADNR has been proceeding with their plans without informing or involving the local government during "scoping" and the preparation of their final proposed public review document.

Passage of the Kachemak bill could directly interfere with putting Mahoney Lakes power and the White River corridor under state ownership, and could also jeopardize the establishment of Leask Lakes State Park near Ketchikan and restrict future local planning options.

13. Clam Cove Stream Nomination: Some local citizens in Clam Cove near Ketchikan are upset with their neighbors nominating the anadromous stream in the cove to the stream catalog. The neighbors who are upset with the stream being nominated have log rafts, floathouses, and "barges" of garbage grounding on the stream in the intertidal area, in addition to major bulldozing and backhoe work on the privately-owned tidelands. The residents with the garbage, floathouses, log-rafts and water-quality problems have threatened to launch a major legal challenge to the cataloging process in order to prevent Clam Cove Creek from being included in the stream catalog.
14. Hobart Bay Logging Activities: Staff completed a follow-up Forest Practices Inspection of "cat" logging activities at Hobart Bay. Klukwan Forest Products has now temporarily suspended these activities, but
